# PROJECT CATEGORIES

# WEB-DEVELOPMENT COURSES

The screenshot displays the ProjectLearn website interface for web development courses. The browser address bar shows 'localhost:3000/learn/web-development'. The page has a teal header with a back arrow, a 'Showing All' button, the title 'Web Development' with '110 Projects', and a search bar. Below the header, statistics show 'Total 110', 'Videos 33', and 'Articles 77'. A 'Technologies' sidebar on the left lists icons and names for HTML5, JavaScript, CSS3, Angular, Vue, React, and Node. The main content area features a grid of course cards. Each card includes an icon (Article or Video), a title, a 'Date Published' timestamp, and a list of technologies used. A vertical 'Feedback' button is on the right side of the grid.

# MOBILE DEVELOPMENT COURSES

The screenshot displays the ProjectLearn website interface for mobile development courses. The browser address bar shows 'localhost:3000/learn/mobile-development'. The page has a pink header with a search bar and a 'Showing All' button. Below the header, there are filters for 'Total' (24), 'Videos' (8), and 'Articles' (16). The main content area features a grid of course cards. Each card includes an icon (Article or Video), a title, a 'Date Published' timestamp, and technology tags. A 'Technologies' sidebar on the left lists various frameworks and languages with their respective icons. A 'Feedback' button is located on the right side of the page.

# MACHINE LEARNING & AI COURSES

The screenshot displays a web application interface for 'Machine Learning & AI' projects. The browser address bar shows 'localhost:3000/learn/machine-learning-and-ai'. The page header includes a search bar and a 'Showing All' filter. Below the header, there are statistics: 'Total 36', 'Videos 5', and 'Articles 31'. The main content area features a grid of project cards, each with a title, date published, and associated technologies. A 'Technologies' sidebar on the left lists various tools like TensorFlow, Python, Keras, and SciKit. The footer includes copyright information for ProjectLearn and a mention of Namecheap.

| Project Title                                        | Date Published | Technologies          |
|------------------------------------------------------|----------------|-----------------------|
| Build a Web Scraper using BeautifulSoup              | 11 Aug 2019    | Python, BeautifulSoup |
| CNN that Detects Pneumonia from Chest X-Rays         | 29 Jun 2020    | CNN, Python           |
| Auto-Updating Data Visualizations in Python with AWS | 3 May 2020     | Python, AWS           |
| Twitter Sentiment Analysis Tool using GCP and Node   | 4 May 2020     | API, GCP              |
| Twitter Sentiment Analysis using CNN                 | 8 Dec 2017     | Python, Matplotlib    |
| Taylor Swift Lyrics Generator                        | 19 Apr 2018    | Python, Keras         |
| MNIST Digit Recognizer                               | 19 Apr 2018    | Python, Keras         |
| Train a Model to Generate Colors                     | 3 May 2018     | Python, Keras         |

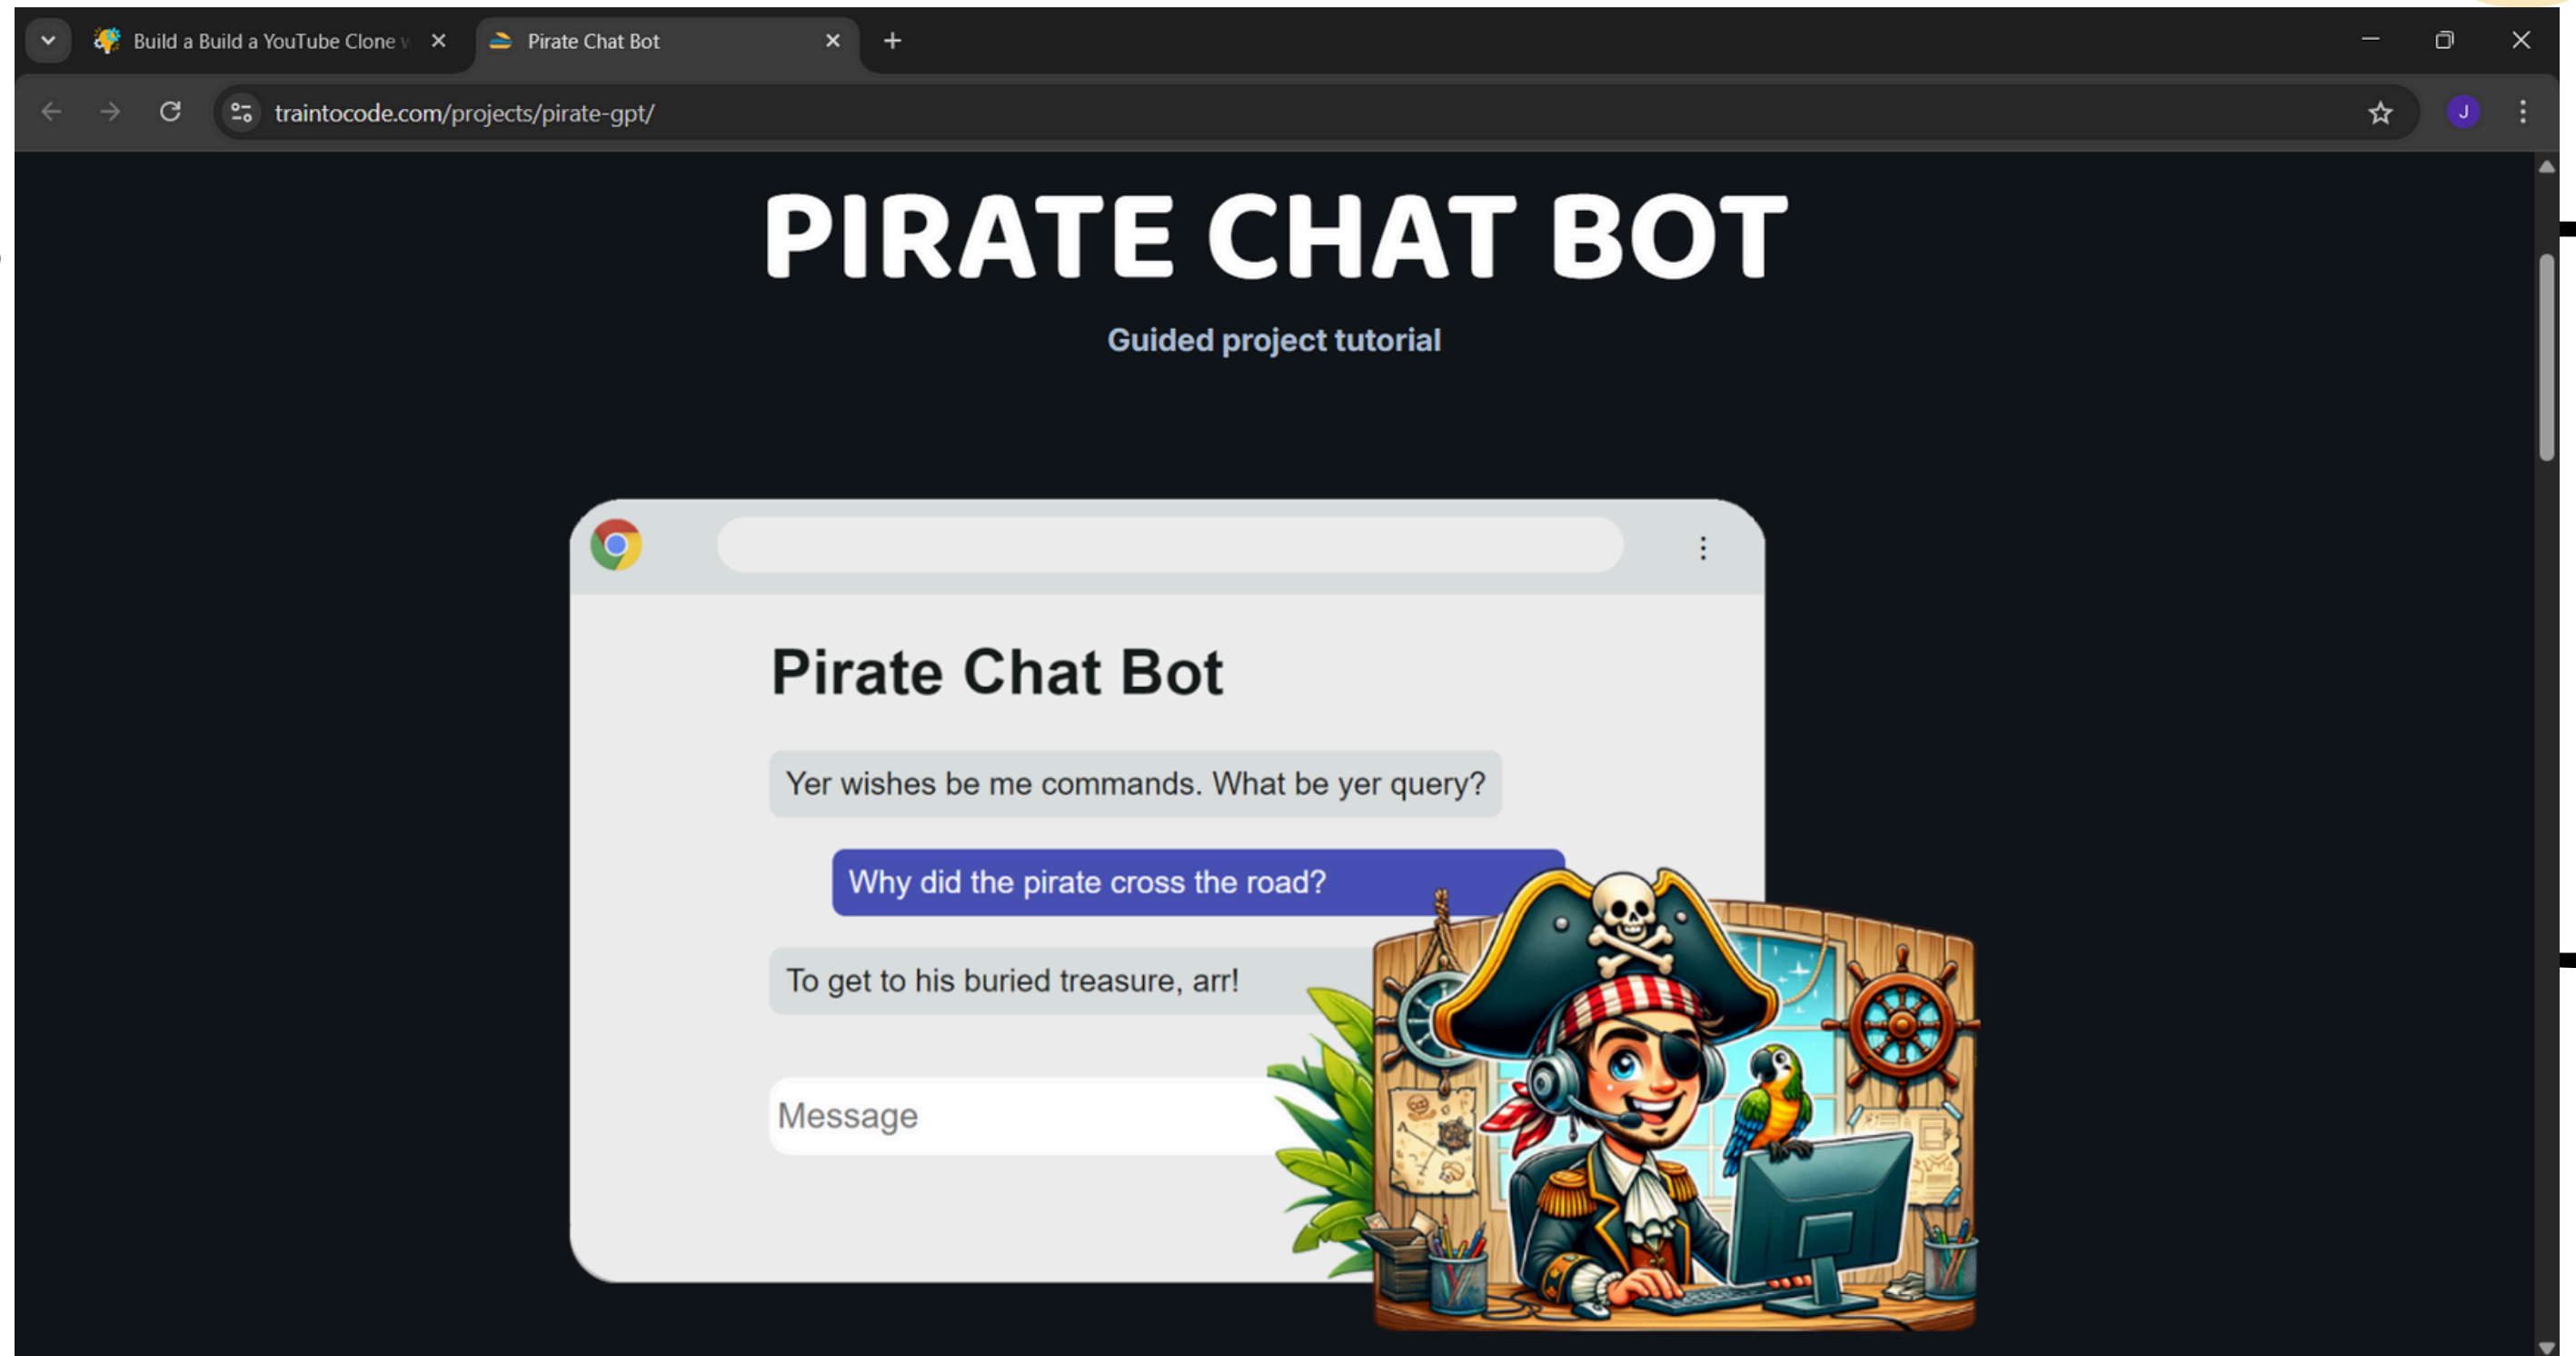

Each project contains a brief overview along with a list of the tech-stack used.

Each link is connected to an external article or video containing the course selected.
